Corporative Partners Program

Partnering with industry to engineer excellence

Established in 1989, the Bourns College of Engineering has established itself as an international leader in research and teaching. With more than 80 world-class faculty, 2,100 undergraduate and 530 graduate students, it continues to innovate and train engineers to provide solutions to the world's most pressing problems.

The Corporate Partners Program opens many doors for you, providing access to a broad range of people and resources to benefit you and your company. Together, we will create a customized set of benefits that meet your company's needs.

Corporate Partner Profiles

Boshart Engineering

“Bourns alumni are among our company’s most valued employees and Bourns interns provide the company with the talent pool we need to keep the company competitive. This year, our company expanded its relationship with Bourns and sponsored a Senior Design team that is investigating active diesel particulate filters.”

- Ken Boshart, President, Boshart Engineering

Bank of America (Silver Member)

“We’re proud to support STEM Outreach at Bourns and give opportunity to a diverse group of young students who will become the next generation of engineers.”

- Louis Davis, Regional Manager, Local Public Affairs, Bank of America

Innovation Economy Corporation (Gold Member)

“The economy needs entrepreneurs for job creation. By working with Bourns, we can identify new business ideas. When we partner these ideas with the Innovation Economy Corporation, we solve one of businesses’ greatest challenges: matching entrepreneurs with mentors who can guide their success.”

- Amro Albanna, Founder and CEO, Innovation Economy Corporation

Winston Global Energy (Gold Member)

“I am pleased to partner with a world-class public university system like the University of California and the innovative faculty and researchers at UCR’s Bourns College of Engineering. Together, we are working to develop new solutions that ensure a clean energy future for our planet and its people.”

- Winston Chung, Founder and President, Winston Global Energy
You need **TALENT**... we have it!

- Access outstanding students for internships and employment
- Sponsor a Senior Design Project
- Access internationally renowned faculty
- Sponsor a graduate student
