The Mentoring Year-round in Biological Engineering Science and Technology (MYBEST) @ UCR program is a National Science Foundation funded program that provides underrepresented undergraduates in both RCC and UCR with research experience and mentoring designed to encourage them to pursue doctoral degrees in biological science and engineering-related fields. This full-year interdisciplinary program provides opportunities for undergraduate students majoring in science and engineering.

**Project Opportunities (Include Working on Cutting-Edge Research in the Areas of):**

- Biosensor development
- Bacterial adhesion
- Microfluidics
- Biotransport phenomena
- Cell signaling
- Cell electromechanics.

**Program Description:**

- Initial 8 week summer research experience: 
  **June 24 - August 9, 2013**
- Faculty mentored research laboratories
- Social and professional development activities
- GRE Preparation Course
- Summer stipends, housing and academic year salaries up to $12,000

**To Apply:**

Application deadline: 
**Sunday, March 31st, 2013**
Underrepresented students encouraged to apply
Must be a US Citizen or Permanent Resident
No Minimum GPA Required
3.0 GPA or higher in science/engineering courses
