STEM-FOCUSED ROBOTICS SUMMER CAMP

NO
EXPERIENCE
REQUIRED

JULY 15 -19, 2024 | 9 A.M. - 4 P.M. | WINSTON CHUNG HALL

High-school campers are introduced to the fundamentals of Electronics and Robotic Systems design. The immersive, custom-designed curriculum includes guided, hands-on lab exercises focused on the most in-demand areas of engineering, including:

- Embedded system design
- Microcontroller programming
- Autonomous and manual robot-car navigation
- Obstacle avoidance
- Wireless navigation control with mobile phones
