

2 Photonics/Optics Postdoctoral Positions Available

Two postdoctoral positions are available July 1, 2019 in a young, vibrant, and well-funded research group at the University of California at Riverside. The position will be initially for 1 year and renewable up to 3, depending on performance and ability to meet milestones. The postdoctoral associates will investigate nano-mesoscale scattering dynamics in nonperiodic and topological systems. Strong theoretical/mathematical and numerical background with physical optics is required. Familiarity with or prior experiences completing tabletop experiments, analyzing angular momentum of light, and implementing machine learning algorithms are a plus. Applicants should have a Ph.D. and possess excellent written and oral communication skills.

For more information, please send CV, brief statement of research interests, and the names and addresses of three references to: Professor Luat T. Vuong, LuatV@UCR.edu with title, "Postdoctoral Position" in the subject line.
